City University of Hong Kong

CityU-EE Student Exchange Scholarships

Regulations

The Department of Electronic Engineering has kindly agreed to establish the CityU-EE Student Exchange Scholarships under the following regulations:

1. The scholarships shall be known as ‘CityU-EE Student Exchange Scholarships’.

2. The value of each scholarship shall range from HK$2,000 to HK$15,000, depending on the applicants’ academic performance and the country where the exchange programme will take place. There will not be a maximum cap on the number of scholarships to be awarded in each year.

3. Both local and non-local students of the UGC funded programmes offered by the Department of Electronic Engineering are eligible to apply and the minimum requirements are as follows:

   ▪ Local students should have (i) achieved a minimum CGPA of 2.5 at the time of application; (ii) successfully obtained a place for an exchange programme; and (iii) fulfilled the language requirement of the University AND the host institution.

   ▪ Non-local students should have (i) achieved a minimum CGPA of 3.5 at the time of application; (ii) successfully obtained a place for an exchange programme; and (iii) fulfilled the language requirement of the University AND the host institution.

   ▪ Scholarship recipients are required to (i) take no less than 12 credits or equivalent on exchange; (ii) satisfactorily complete the exchange programme; and (iii) resume studies at CityU in the semester immediately following the exchange (except for those joining the exchange in their final semester). Failure to fulfill these requirements will result in the withdrawal of the scholarship.

4. The scholarship will be released by two equal installments before and after the exchange studies. Students failing to fulfill all of the above requirements will have to refund the full amount of the scholarship to the Department.

5. Scholarship recipients are required to be CityU-EE’s student exchange ambassadors. They are expected to promote the image of the University and Department in the host institutions. On their return, they are required to (i) provide an exchange blog for sharing their experience with fellow students; and (ii) be advisors for future exchange students.

6. Confirmation will be sought from the Department when the fund is used up on whether the scholarships shall be continued.
