

Ms CHANG Wan Si Vinci (2005 BEngECE, 2008 MScEIE)

Feeling that she has not acquired enough knowledge in applied electronic engineering in her undergraduate study, Ms Chang decided to return to CityU EE to pursue a MSc degree. She feels that the knowledge in a master's degree puts more emphasis on the application aspects, where she finds more useful and beneficial to her career. She chose EE in CityU due to its prestige in the field, and decided to return to do a master's degree after graduating from bachelor's degree.

She describes her university life with CityU EE as bitter-sweet, and is filled with 'sweat, laughter, and tears'. She had fruitful experiences and ample opportunities to participate in multiple activities throughout her study, including student-initiated projects, contests, and being a committee member of the Electronic Engineering Society. Pursuing these activities help her understand more of her strengths and weaknesses, as well as bringing her self-fulfilment.

The thirst for knowledge and learning have no end. That is why Ms Chang pursues a master's degree after finishing her bachelor's degree here at CityU EE. She encourages our current and future EE students by saying: "We must take adventures to know where we truly belong". University is a good start for self-exploration, and the discovery of endless knowledge.

She is currently taking a break from her previous job in Furrion Ltd.
