Job Opportunity: Developer from Guy Carpenter

Guy Carpenter in Hong Kong is offering a position, Developer, with job details listed below. Interested parties please send your CV to Michael Owen at Michael.G.Owen@guycarp.com.

The role is intended to support:
- Maintenance of some existing internal programs written in C++ and Java. Example include custom Excel ribbons with calculations run in other applications (R, C++) and R-Shiny web based tools.
- Application development to improve work flows through automation of data extraction and transformation (ETL) including data visualization.
- Web-scraping and data processing.
- Application development to automate repetitive tasks.

The preference is a candidate with experience with:
- Objected-oriented programming languages (Java, C++ and/or C#)
- Experience with graphical user interface development, in particular, Windows Presentation Foundation (WPF)
- Knowledge of Python and/or R and web scrapping packages.
- While not essential, understanding of Power BI is preferred.
