
算範圍內為企業構建合理的信息安全體系。

IT審計師

據市場研究公司Gartner公司發表的研究報告稱，IT審計師目前已成為全球性最搶手的專業人才。這些人才一般都具備全面的電腦系統軟硬體知識，對網絡和系統安全有特殊的敏感性，並且對財務會計和部門內部控制有深刻的理解。國際會計師審計師事務所、IT專業諮詢公司、經濟管理類的集成軟件供應商、IT管理顧問等，都將信息系統運行風險與安全管理作為諮詢和服務的重點。多數的大型跨國公司，由於普遍使用大型管理信息系統，都非常重視對信息系統安全和穩定性的控制，常常高薪聘請IT審計師進行內部審計。IT審計師主要向客戶提供與信息系統相關的風險評估及管理服務，從事的工作包括：評估每個被發現的風險的嚴重程度、落實反風險措施以減輕特定的影響、評價和評估任何反風險措施的有效性（以及它們的成本效益）。

IT行業的高科技、時尚和優厚待遇吸引很多人爭先恐後地加入「IT人」的行列。然而，激烈的競爭氣氛，巨大的工作壓力，相對較長的作業時間，封閉的工作環境，這些都讓從業者開始氣餒及懷疑，在表面上的華麗背後，IT工作真的是理想選擇嗎？所以要成為一位出色的「IT人」，本身須具備全面的資訊技術、豐富的專業知識、敏銳的洞察能力、成熟的工作態度、徹底解決問題及準確的決定能力等等的素質。在此與同學們共勉之！

Exchange Study Programme

My Exchange in Yonsei University, South Korea

AU YEUNG Oi Shan

BENG3-ECE, Yr 4

My Blog

Hong Kong people love Korea very much. They are getting crazy on K-pop Star, Korean drama, and Korean foods. However, they can only experience Korea as tourists. For me, the exchange program has given me a chance to study in Korea – I made friends with local Korean, I learned Korean from Local Korean teachers, I could deeply taste the Korean culture and know the society. I bet this will make everyone jealous.

My Pre-departure Checklist

Before departure to Korea, a student visa (type D-2) is needed. When applying for a visa, your bank account should have a saving of at least HKD\$25,000 for 3 months. Also, a supporting letter from CityU showing you are being sent as exchange students is needed. You are required to apply for this letter with MEAO.

Just Arrived...

I was first so nervous because it was my first trip to Korea and first time to travel alone. The arrival was my worst day in Korea. It was so difficult to carry two big suitcases all along when walking on the street, especially when the place was most crowded in the evening. The situation was worsen by my ignorance of the way to the hostel. There was no other way but to phone up my host at the hostel. He guided me to the place, and helped me carry the suitcases upstairs because there was no lift. After that, he took me to a traditional Korean restaurant to have my first meal in Korea.

Orientation

The orientation was held for a whole day. It provided lots of information for students to note during their stay in Korea and their study in Yonsei. The campus map is the most important. Unlike CityU, Yonsei campus is so huge that it is almost ten times larger

than CityU and it is easy to get lost there.

Also, we met our mentor and other mentees for the first time in the Mentors Club. It was my first step to make friends with local Korean people and students from all around the world. We had our dinner and party in a traditional fried-chicken restaurant and it was a nice evening.

My Place

There is a kind of popular accommodation for students, which is called고시원. It is like a student residence hall, but having all individual rooms. Also, rice, kimchi, coffee, noodles are available always in the kitchen. Since it is cheap, many local and foreign students prefer to live in this kind of house. The host was a local Korean family. They were very kind that they always cooked traditional Korean food for us. And at the day I left Hong Kong, they helped me take my heavy luggage to the bus stop. I was so thankful for their care and help during my stay.

My First Class

At the first class, I noticed that the notes were all Korean. Fortunately, the professor gave me an English reference book. He also gave me some extra lessons after classes. Attributed to his extra time and effort, I finally got good result in the exam.

Also, the relationship between professors and students were very good. They always had dinner and party together. It is not difficult to find photos for the happy time we spent together.

The learning motivation in Yonsei is worth appreciating. Besides lecture notes, most students also studied different reference books. Also, they seldom skipped classes and could pay attention even though they got drunk the night before.

People I Met

Because of the group projects, I made some friends with some local students. One called Cada impressed me most. He came from Turkey and was studying in Yonsei as a regular student. I admired him very much because he managed to speak fluent Korean. He recommended good places to travel, good methods to stay warm in freezing winter. He also helped me check the exam schedule which was in Korean.

Korean people love travelling. When I travelled in Sochu, I had two Korean roommates from Seoul. It is funny that Korean girls also love Hong Kong pop stars and our food very much. They said that Leung Chiu Wai and Leslie Cheung were very handsome.

Out of Classroom

The most exciting extra-curricular activity was held in a school in Yo-Ko Jeon. It was a sport festival held between Yonsei University and Korea University. There were five different sports games. I have watched the basketball, baseball, football and ruby games. All the students wore different colors of T-shirts representing their schools. A sea of blue and another sea of red were cheering for their school representatives. Different schools had their own cheering teams, songs and corresponding dance and motions. All the students including the exchange students were shouting in their full strength. The scene was so touching as it could unify so many people together.

Money

Roads in Korean are not as smooth as those in Hong Kong. It is easy to break the mobile screen if you drop your mobile phone on the ground. Many people are using broken phones. And unfortunately, I became one of them. The screen of my mobile phone was broken accidentally. So I had to take the phone for repair. At the service counter, no one was able to speak English. However, once I took out my phone, they smiled and seemed to know why I was there. It is funny that though we could not speak the same language, we still could communicate. Repairing the phone screen was expensive. To compensate, I had cooked my own food in dome for one week instead of eating out.

Goodbye

4-month exchange life was totally not enough for me. It was a pity that when I began to get used to live in Korea just like local people, I had to leave. But I still have to thank all the people who helped me a lot to make my dreams come true. Also, I have to thank myself that I can overcome so many challenges and never give up. 감사합니다!!

Some Korean love talking to tourists but I could not understand Korean well so I did not chat much with them. This always made me feel sorry. But it encouraged me to continue my Korean learning when I came back to Hong Kong. I hope that when the next time I

visit Korea again, I can chat with Korean natively.

Home Sweet Home

Before studying in Korea, I had never borrowed reference books because there were too much to read and some of the contents were not easy to understand. However, I got used to read reference books in Korea, and realized that they contained lots of useful information. I will try to read more reference books in my study in Hong Kong.

In Korea, I always visited different places when I was free. I always looked around because I am curious about things around me. I apply this good habit when coming back to Hong Kong, and have realized that in the past, I used to miss a lot that were happening around us. Now I am learning to observe more when I am walking on the street to discover more interesting things.

Sharing

I would like to encourage student to be more brave and proactive. Lots of students do not have enough self-confidence to believe they could be selected in interviews for going on exchange. I also thought the same way when I was in year one but I regret. I made up my mind to apply for exchange program even I knew that I had to defer my study. After finishing my exchange life in Korea, I realized that it was really of great worth.

Overall Rating

I would like to rate my exchange experience 4 (out of 5). I had experienced many aspects of Korea that tourists never have chance to experience. I overcame many difficulties that I had never met in Hong Kong. Also, I had done lots of things that I would not do in Hong Kong. All these reflected a new kind of me and helped me improve myself. I hope my friends could also be able to grasp what I experienced in Korea.

My Exchange in Shanghai Jiao Tong University, China

CHAN Wai Yin

BENG3-ECE, Yr 3

My Pre-departure Checklist

Before I went to mainland China, I checked the expiry date of my Mainland Travel Permit for Hong Kong and Macau Residents.

Please also get ready with you the address of your school and the dormitory for locating the place more conveniently.

Just Arrived...

The first day was unforgettable. I went to my host university by taxi. When I arrived at the university, I did not know where I should go first. I asked the local students for help. Finally, one of the students brought me to the place for registration and got me to my dorm. I was grateful for his help.

Orientation

There was no orientation organized by the host university but it was not difficult to meet new friends since we could use putonghua to communicate. The students in the university were very nice and friendly and most of them helped eagerly the new students to adapt to the new environment.

My Place

My accommodation was fair. I lived with a Taiwan student. When I arrived at my dorm, it was a little bit dusty and I cleaned it for half an hour. Insects were common in our flat for the summer. To avoid the insects coming into our room, we turned on the air-conditioner.

Our dorm is on the school campus but it is far from the place for lessons. So, most of the students rode their bicycles for travelling. Our dorm is rather safe and we had not heard about thefts in the dorm. However, some bicycles of the exchange students locked outside the dorm have been stolen.

My First Class

The learning style was different from CityU. In Shanghai Jiao Tong University, they only have lectures but not tutorial classes. The lecturers are more focused in teaching the knowledge and you
