

Mr. Bobby Sin-tou Fu (2006 BEng), had worked with multiple companies after he graduated, involving in important projects like city development projects.

Tobby accounts for his ability to do self-directed learning to the flexibility and opportunities given by CityU EE for him to work on his own FYP topic. Such ability benefitted him a lot later in his life, where he had developed a multidisciplinary career and achieved life-long learning.

Regarding opportunities in his undergraduate career, he said the Elite Programme had discovered his leadership potentials, which is crucial to his later extensive career development including working in leadership positions.

This also lays the basis for his further education: a Master Degree in Engineering Business Management transited his engineering career into a management career to lead a team of more than 10 engineers to develop a system.

His encouragement to our EE students is to preserve and have passion, so that you can achieve long-term and meaningful goals in life.
