Assistant Sourcing Engineer / Sourcing Engineer

Programme Highlights

Organized for over 10 years, the Graduate Trainee Program – 3-year Executive Development Programme has nurtured a number of business & technical elites in the Group. As a leading company of professional audio products, we are now offering an excellent long-term career development to high-caliber graduates from different discipline to cope with our company development in the Greater Bay Area.

Besides promising career development opportunities, you will be offered a comprehensive training, job rotation, project-based exposure and bi-annual review in this programme.

The Sourcing Engineer will explore and develop advanced technology to facilitate the new product development and sourcing related opportunities in the coming 12 months. This role will be acting as the interface between supplier and design engineering to determine new and alternative sourcing strategies.

Responsibilities

- Work with Engineering and Sales & Product Marketing Department on advanced sourcing
- Perform vendor sourcing according to various criteria for electronics and electro-mechanical parts and components
- Source and select the suitable electronic/ mechanical components for the manufacturing of our OEM and ODM products
- Negotiate with suppliers to obtain most favorable price, schedule, and terms and conditions
- Communicate with suppliers to ensure the components are delivered in a timely manner

- Collaborate with different departments within company
- Handle any ad hoc projects required

Requirements

- Bachelor's degree in Electronics Engineering or equivalent
- Experience in sourcing electronics and electro-mechanical components is preferable
- Energetic, aggressive and self-initiative
- Able to work under pressure and tight schedule
- Good communication & interpersonal skills
- Good command of English, Chinese and Mandarin
- High mobility and willing to take overseas assignment is preferable
- Travelling to Shenzhen R&D Centre & Huizhou Factory is required (Subject to the pandemic situation)

Company Benefits

Besides promising career development opportunities, we work 5 days a week and offer competitive remuneration package including double pay, medical benefit, flexible working hour and free shuttle bus.
