Founded

2017, re-established from CityUROVTeam (founded in 2006)

Goals

CityU Underwater Robotics consists of thirty multicultural students who are enthusiastic in underwater robotics, ranging from business students to engineering students.

We aim to attach achievements in competitions, to engage the public participation in community into the industry, and ultimately extend the application of the robot into real-life usage.

To catch the eye of community about underwater robotics industry, we actively promote STEM education to next generation by holding workshops and competitions.

Highlights

2015 — Advanced into International MATEROV Competition in NASA Neutral Buoyancy Laboratory

2016 — First approved ROV Workshop organizer by Marine Advanced Technology Education (MATE) in Asia

2017 — Second Prize Award in International League of Underwater Robot

2018 — 2nd Place in Shanghai Harbour CityU underwater Robot Competition

2019 — Most Innovative Engineering Award in Singapore AUV Challenge

2020 — 5th place in the Explorer Class of MATE ROV World Championship, USA

2023 — 4th place in the Explorer Class of MATE ROV World Championship, USA
